Jayden - Identify

Your part: Explain the problem we chose and what our research helped us discover.

Write 2-3 short bullet points per question in your own words. Use real team examples.

1. **Why do Jefferson Salamanders need help at Stouffville Road?**
   Think back: What happens to a salamander travelling between the forest and the pond when a road is in the way?

2. **What did our tunnel visit and research teach us about the help already in place?**
   Think back: What do the tunnels, fences, and camera we saw do for the salamanders?

3. **What do we still need to find out about salamanders using the tunnels?**
   Think back: What if an animal enters a tunnel but turns back before the other end? How would anyone know?
