Kayden - Communicate

Your part: Explain how we shared our project and learned from other people.

Write 2-3 short bullet points per question in your own words. Use real team examples.

1. **How did our team introduce our salamander project to the experts at TRCA?**
   Think back: What did we put in the email and questions we sent to the wildlife experts?

2. **Which answer from Dr. Ruppert helped our team most, and why?**
   Think back: What did the experts tell us about where salamanders like to be, and how did that change our plan?

3. **What would you show the experts in our demonstration to get useful advice about our solution?**
   Think back: What if we showed our prototype lizard moving past a sensor and asked for advice?
