JOYROBOTS EXCAVATORS | TEAM #65536

Week 7 Homework

Prepare for Our Expert Interview

Name: _____

Our interview with **Dr. Jonathan Ruppert from TRCA** is on **Thursday, November 5, 2026, from 4-5 p.m.** We will share our project through a quick live demonstration or a short video and ask for his advice.

Your homework: Write TWO new follow-up questions.

First, read the TRCA response shared with this homework. They have already answered:

- Why they focus on Jefferson salamanders.
- What they know about yearly salamander deaths and tunnel use.
- What conditions salamanders prefer in tunnels.
- What else TRCA does to help salamanders.

Do not repeat these questions or ask for information already in the response. Build on what we learned and explore something new. Try starting with “How...,” “Why...,” or “What would you recommend...”

1. My question to learn more about their work:

2. My question to help improve or test our project:

Before you finish: Check that neither question is already answered in the TRCA response. Bring both questions to our next team meeting!
